

Shed some light ... on **psychology** at MCSI

Psychology is an exciting field of study that combines theory about the human person with practical skills in counselling.

What would a Christian perspective bring to the various theories and practices of counselling? The MCSI subject **Counselling Theory: Christian Perspectives** offers a critical survey of the major current approaches to counselling, balancing theoretical and theological issues with an emphasis on practical service and therapy. It is designed to appeal to both students and those working in the field.

You can also take subjects in science, philosophy, the Bible, ethics, Jesus, the media, economics, education, pop culture and justice.

See www.mcsi.edu.au for information and timetables.
